SUMMARY

Business and project professional with experience across **operations, project coordination, research, data analysis, compliance and stakeholder management**. Experienced in managing competing priorities, monitoring risks and deadlines, maintaining accurate records, and preparing reports and dashboards to support decision-making. Building specialist expertise in **sustainability, ESG reporting, environmental performance and resource efficiency** through independent research, sustainability projects and professional training. Knowledge of key frameworks including **GRI, CSRD/ESRS, BRSR and TCFD**, with an interest in waste reduction, sustainable operations and the practical implementation of sustainability initiatives.

PROFESSIONAL EXPERIENCE

Operations Manager | Greggs plc | UK — Mar 2024 – Aug 2026

- Led day-to-day operations across **three high-volume sites**, managing staffing, stock availability, resource allocation, health and safety, and operational priorities to maintain consistent service and site performance.
- **Reduced product waste by 15% within three weeks** by analysing production patterns, previous weeks' sales and demand trends to improve production planning and reduce overproduction.
- Maintained **zero compliance breaches** across the sites by monitoring health and safety and operational requirements, identifying non-conformances, assessing risks and coordinating corrective actions.
- Reviewed operational performance, product availability and stock discrepancies to identify recurring issues and support resource efficiency, performance monitoring and continuous improvement.

Project Manager — Consulting | Blackmont Consulting | UK — Aug 2025 – Sep 2025

- Coordinated delivery of a **fintech MVP across six parallel workstreams**, working with an eight-member team to manage project plans, allocate tasks, track milestones and maintain progress against agreed deliverables.
- Facilitated client review meetings, translated stakeholder feedback into action plans, documented decisions and coordinated follow-up activities across workstreams.
- Developed and maintained **project governance documentation, risk registers, sprint plans, executive dashboards and progress reports**, reducing senior review preparation time by **60%**.
- Tracked project risks, deadlines and dependencies through Jira, identifying delivery blockers and coordinating corrective actions to support timely project delivery.

Business Analyst | Terrain Infratech Pvt Ltd | India — Sep 2022 – Aug 2023

- Coordinated **20+ infrastructure tender proposals** over the course of the role, managing regulatory research, compliance reviews, technical evaluations and risk assessments to support accurate, timely submissions.
- Conducted supplier evaluations, pricing analysis and supply-chain due diligence, contributing to an estimated **10–15% reduction in procurement costs**
- Developed **Excel-based bid governance dashboards and compliance trackers** to monitor submission deadlines, documentation gaps, risks and outstanding requirements, improving visibility across the tender pipeline.
- Prepared technical submissions, regulatory documentation and supporting reports, translating complex requirements into clear, accurate deliverables for internal and external stakeholders.

Business and Marketing Analyst | Punjab Farmers Pvt Ltd | India — Sep 2020 – Aug 2022

- Analysed **supply-chain, sales and operational data** to identify demand and purchasing trends, supporting procurement planning and contributing to an **improvement in revenue**.
- Managed relationships with suppliers**,** monitoring delivery, performance and supply requirements and coordinating corrective actions to maintain continuity of supply.
- Prepared **management reports and operational summaries**, consolidating procurement, supplier and sales information to support regular business decisions.

Finance Associate | N.R. Builders & Developers | India — Oct 2019 – Jun 2020

- Managed **financial tracking, cost variance analysis, and regulatory compliance reporting** across multiple concurrent EPC construction projects, directly informing budget reallocation decisions and enabling senior management to **course-correct cost overruns before project close-out**.
- Produced **structured financial performance reports** that consolidated expenditure trends, cost deviations, and project milestones, improving senior visibility into project health and **reducing financial reporting turnaround time.**
